CAREER OBJECTIVE

Motivated Artificial Intelligence and Data Science undergraduate seeking internship opportunities where I can apply my skills in Python, data analysis, and machine learning to solve real-world problems while continuously enhancing my technical expertise.

WORK EXPERIENCE

Data Science Intern

Feb 2026 - Present

Codveda Technologies

Virtual

- Performed Data Cleaning and Exploratory Data Analysis (EDA) on client datasets using Python and Pandas.
- Built Machine Learning classification models such as Logistic Regression and Random Forest using the Iris dataset.
- Developed a Sentiment Analysis model using Natural Language Processing (TF-IDF vectorizer and Naive Bayes classifier).
- Visualized data insights using Matplotlib and Seaborn and documented projects systematically on GitHub.

Data Science Intern

Jan 2026 - Feb 2026

Coding Samurai

Virtual

- Learned and applied data analysis and machine learning concepts using Python scripting.
- Performed data cleaning, preprocessing, and statistical visualizations to analyze tabular datasets.
- Built a sentiment analysis project to classify social media postings into positive, negative, and neutral sentiments.
- Collaborated with technical mentors and gained practical exposure to real-world data science workflows.

Data Science Intern

Jul 2025 - Aug 2025

Cognifyz Technologies

Virtual

- Worked on data analysis tasks leveraging Python, Pandas, and NumPy for structured processing.
- Performed data cleaning and exploratory data analysis (EDA) to extract meaningful insights.
- Created data visualizations using Matplotlib to demonstrate trends and target parameters.
- Applied basic machine learning concepts and strengthened analytical problem-solving skills.

PROJECTS

MAP – Multi-Agent AI Automation Platform

Mar 2026 - Jun 2026

- Architected a distributed system decomposing complex tasks into subtasks executed by specialized AI agents: Planner, Executor (ReAct loop), Analyzer, and Memory agents.
- Integrated LangGraph for stateful agent orchestration with FAISS/Chroma vector memory; circuit-breaker Fallback Engine switches between Gemini API and local BentoML (Mistral7B).
- Built Redis-backed Celery worker pool with priority queues, Prometheus + Grafana monitoring, and Nginx-proxied Docker services; real-time task streaming via WebSocket and SSE.

BookEase (appointment-app) – FastAPI App

May 2026

- Developed a full-stack appointment booking platform during the Odoo Hackathon using FastAPI, SQLite, Jinja2 templates, and Stripe SDK.

- Implemented secure authentication, online booking engines, Stripe checkout payments, provider slots management, and responsive dashboards.

Student Performance Prediction

Jan 2026

- Developed a machine learning model to predict student academic performance using Python.
- Performed data preprocessing including handling missing values, encoding categorical variables, and evaluating accuracy and classification metrics.
- Implemented and compared Logistic Regression and Decision Tree models, generating data charts using Matplotlib.

Smart Internship Matcher

Oct 2025 - Nov 2025

- Participated in a hackathon to build a candidate-to-requirements matching system evaluating candidate skills against internship offerings.

EDUCATION

Bachelor of Engineering (B.E.), Artificial Intelligence & Data Science

2023 - 2027

Shree Ramchandra College Of Engineering (Savitribai Phule Pune University)

Pune, India

1st Year: CGPA: 8.64/10 | **2nd Year:** CGPA: 9.86/10 | **3rd Year:** CGPA: 9.29/10 | **Cumulative:** CGPA: 9.26/10 (Ongoing)

TRAININGS, CERTIFICATIONS & EXTRA DETAILS

- **Data Science with AI (Internshala Trainings):** 8-week certified online training covering predictive analytics, data visualization, and model building. Scored 90% in final assessment, top performer. (Dec 2025 - Feb 2026)
- **Deloitte Virtual Internship Program:** Completed data analysis and business problem-solving modules.
- **J.P. Morgan Quantitative Research:** Virtual Experience covering default probability analysis and FICO bucketing.
- **Oracle Database & SQL Certification:** Database fundamentals and SQL queries.
- **Hackathon Participation:** Odoo Hackathon (BookEase platform design) and Smart Internship Matcher team challenge.

TECHNICAL SKILLS

Languages & Core: Python, SQL, TypeScript, JavaScript, Next.js, React, HTML5, CSS3**Data Science & AI:** Pandas, NumPy, scikit-learn, Machine Learning, Data Cleaning, Model Evaluation, Matplotlib, Jupyter Notebook**Tools & Libraries:** GitHub, Git, MS-Excel, Tailwind CSS
